

S3-Link File Upload Fields

Introduction

This guide is used to enable custom fields in S3-File Upload components so users can set values for those custom fields while uploading files.

Setup

Please follow the below steps to enable custom fields in file upload components.

1. Go to Setup > Object Manager > S3-File > Field Sets
2. Open "Other File Fields For Upload Page"
3. Add all fields which you want to enable in File Upload components
4. Click "Save"
