S3-Link Public Site Setup

Introduction

This guide is used to enable setting to send and Upload / Download links in the email.

Setup

Please follow below steps to send Salesforce links for file downloads in the email.

- **Create a Public Salesforce Site(if not available)**
    1. Go to Setup > Sites
    2. Click **New**
    3. Provide Site Label, Site Name & Active Site Home Page
    4. Click **Save**
    5. Open Site detail
    6. Click **Public Access Settings**
    7. Click **View Users**
    8. Open Site Guest User detail
    9. Go to Permission Set Assignment section
    10. Click **Edit Assignments**
    11. Assign "S3-Link User Real Only" permission set
    12. Click **Save**

- **Enable Public Site URL**
    1. Go to Setup > Custom Settings > Application Configuration > Manage
    2. Click New
    3. Provide below values and click **Save**
        - **Name**: Public Salesforce Site URL
        - **Configured Value**: {Copy & paste Site URL}
        - **Description**: URL of public Salesforce site which will be used to download S3 files using password protected links.
        - **Display Layout**: Simple Text
        - **Label**: Public Salesforce Site URL
        - **System Configuration?**: True

Application Configuration Edit

Provide values for the fields you created. This data is cached with the application.
