G-Link Auto Export Email Attachments

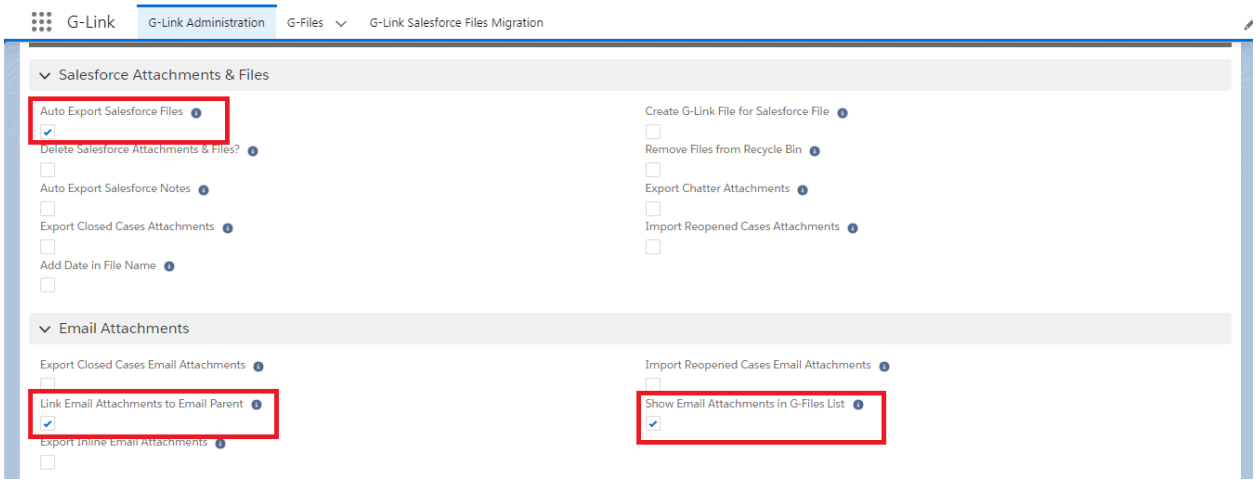
Introduction

We have a feature that auto moves Salesforce email attachments and files in Google Drive. You will just have to enable that feature.

Functionality Overview

You just have to enable that feature by following the below steps.

1. Go to **G-Link Administration** > **File Export Configuration**
2. In the Salesforce Attachments & Files section, set the **Auto Export Salesforce Files** to true
3. In the Email Attachments section, set the **Link Email Attachments to Email Parent** and **Show Email Attachments in G-Files List** to true



4. In the Salesforce Objects to export Email Attachments & Files section, click on **Add Objects**.

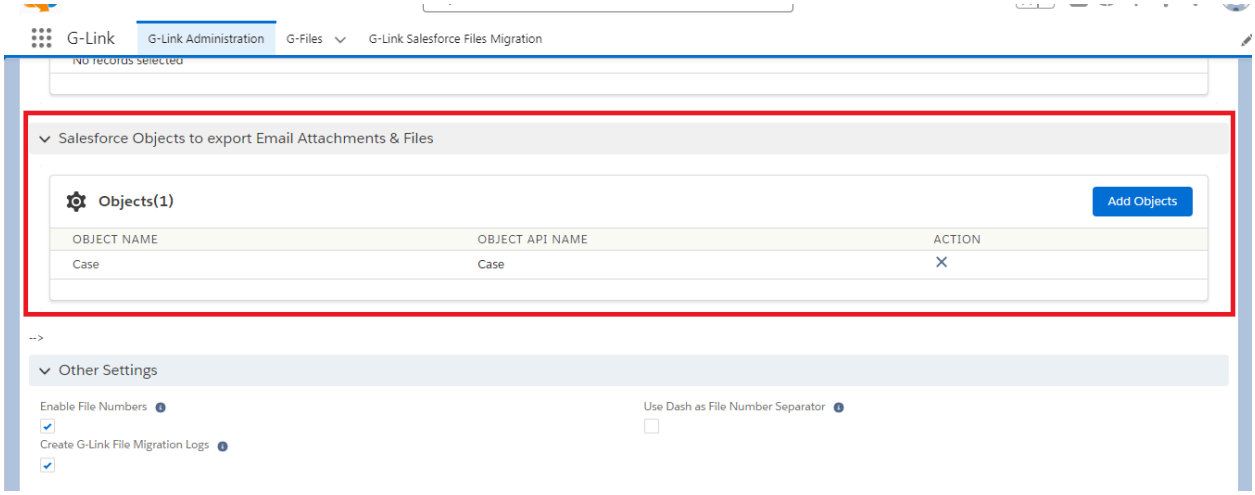
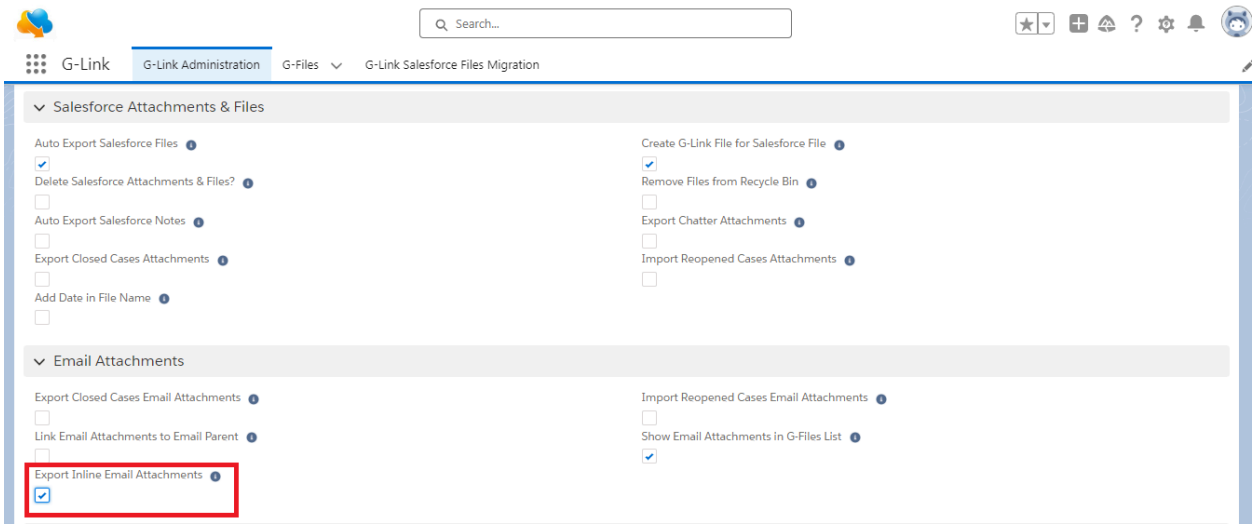
5. Select the object(whose related email attachments you would like to auto upload to Google Drive) and click on **Add**



6. Click **Save** on the top of the page to save the configuration.
7. If you also want to auto upload the inline images inside the email body in Google Drive, set **Export Inline Email Attachments** to true in the Email Attachments section



8. Click **Save** on the top of the page to save the configuration

Note: If you will enable Export Inline Email Attachments, images in email body like email signature & company logos will also be auto uploaded in Google Drive
