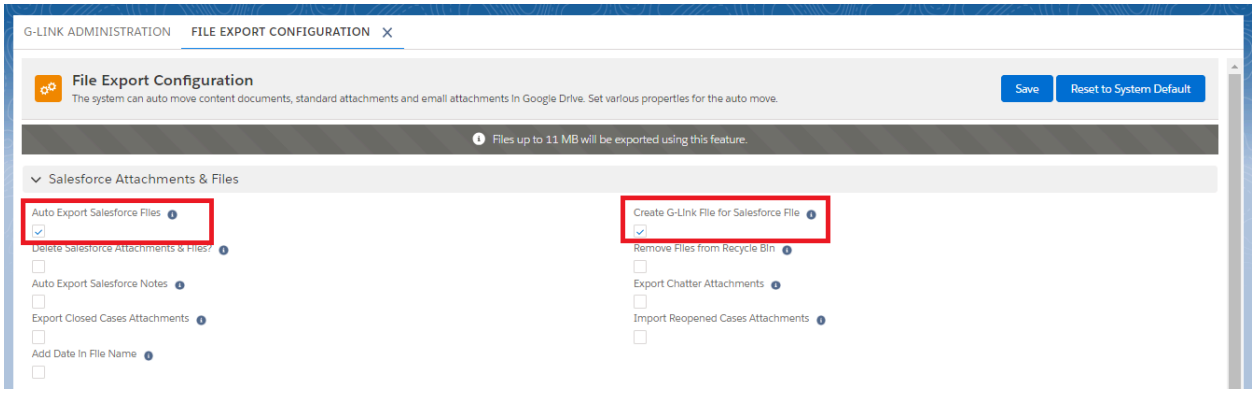
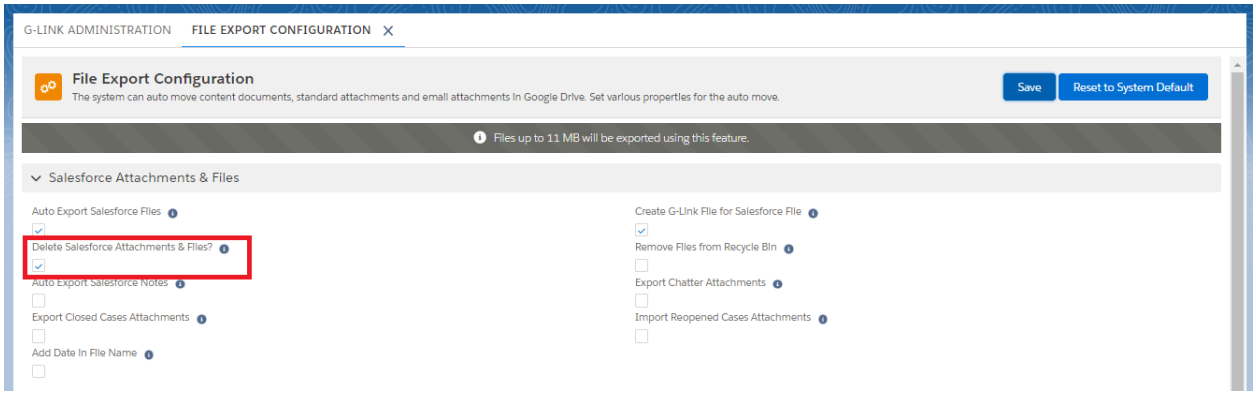
G-Link Auto Export Salesforce Files

We have a feature that auto-moves Salesforce files/attachments in Google Drive and attaches them with parent records. You will just have to enable that feature. Follow the below steps to enable the auto export Salesforce files/attachments feature.

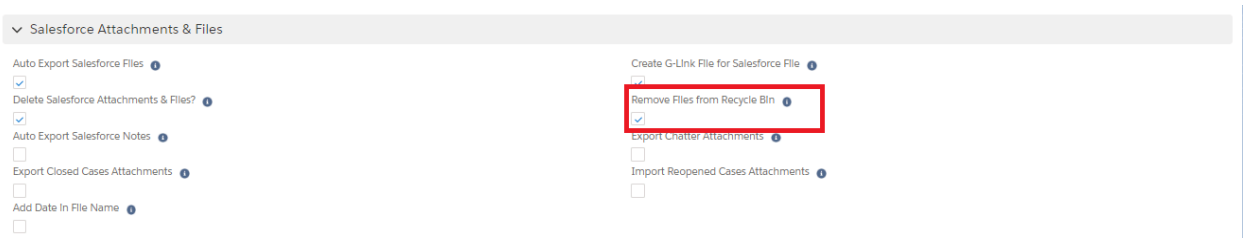
1. Go to G-Link Administration > File Export Configuration
2. Set File Export Configuration as per the attached screenshot



3. If you want to delete Salesforce Files once it is uploaded in Google Drive, set **Delete Salesforce Attachments & Files** to true



4. Ifa above setting is true and you want to remove deleted Salesforce Files from Salesforce Recycle Bin, set **Remove Files from Recycle Bin** to true



5. Add your object(whose related Salesforce Files you want to auto upload in Google Drive) in the **Salesforce Objects to export Related Attachments & Files** section
